PROJECTS

AI Study Companion

Built a study companion app that summarizes PDFs using NLP and auto generates study plans from syllabus. Improved learning efficiency through smart scheduling and content.

SENTINEL-AI SYSTEM

Bridges, flyovers, and buildings show early warning signs like vibration changes, internal stress, and small cracks before failure. These signs are rarely monitored continuously because inspections are manual and done only at long intervals. As a result, risks are detected too late, when the structure has already become unsafe.
